AUTHOR	Dudek, R. A.; And Others
TITLE	Human Rehabilitation Techniques. Final Report. Volume I, Part B.
INSTITUTION	Texas Tech Univ., Lubbock.
SPONS AGENCY	National Science Foundation, Washington, D.C. Office of Exploratory Research and Problem Assessment.
PUB DATE	77
GRANT	ERP-75-10594; ERP-75-10594-A01
NOTE	244p.; A Technology Assessment; For related information, see EC 104 163-174
EDRS PRICE	MF-$0.83 HC-$12.71 Plus Postage.
DESCRIPTORS	*Bibliographies; *Handicapped; *Policy; *Rehabilitation

ABSTRACT

Presented is the bibliography to Volume I of a six-volume final report, which describes the activities and findings of a research project to identify the policy-related aspects and technology involved in efforts to aid disabled individuals in the United States. Separate listings are provided for each of the first volume's seven chapters. Entries usually include author, title, publisher or source, publication date, and pagination. (SBH)

FOREWORD

This document is the first volume of the final report *Human Rehabilitation Techniques: A Technology Assessment*, a project conducted at Texas Tech University by the Department of Industrial Engineering, the Research and Training Center in Mental Retardation, the Department of Systems, and the Technical and Professional Writing Program. The research has been conducted with the support of National Science Foundation grants ERP 75-10594 and ERP 75-10594 A01, monitored by the Directorate for Research Applications, Division of Exploratory Research and Systems Analysis.

Richard A. Dudek, Horn Professor and Chairman of the Department of Industrial Engineering has been a co-principal investigator and director of the project. Gerard J. Bensberg, Director of the Research and Training Center in Mental Retardation, and M. M. Ayoub, Professor of Industrial Engineering, have been co-principal investigators. Carol M. Sigelman and Andrew S. Martin of the Research and Training Center in Mental Retardation and Robert F. Powers of the Department of Industrial Engineering have been program managers for the project. James R. Burns and William M. Marcy of the Department of Systems have been in charge of the modeling used in the project. Technical writing has been performed by Charles W. Brewer and Cynthia E. Lyle of the Technical and Professional Writing Program. In addition, several research assistants and support personnel, as listed in the individual volumes of the study, have contributed to the project.

The project team wishes to acknowledge the efforts of individuals who have served on the Oversight Committee, Elizabeth Boggs, Kan Chen, Beatrix Cobb, Ronald Conley, Richard Herman, John Noble, Jr., Evan Vlachos, and Lester Wolcott; of Lee Phillips who served effectively as a program manager for a short time before leaving Texas Tech; of Brian Lambert who served as Work Session Conference Coordinator; of those who participated in the work-sessions chaired by Ted Hartman, David Malone, Blair Rowley, Evan Vlachos and John Wittman; and of Anne Seitz, the Secretary of the Project.

Although the National Science Foundation has supported this project, the findings, conclusions and recommendations expressed are those of the research team and do not necessarily reflect the views of NSF.

PREFACE

During the course of *Human Rehabilitation Techniques: A Technology Assessment*, a vast amount of information was collected for analysis by project team members. This part of volume I presents the bibliography used in support of the project. It is presented relative to the chapter to which the material primarily pertains.
